Nutri-Calm
Nutrition for a calm nervous system

Nutri-Calm is an anti-stress vitamin supplement (in an herbal base) with a proven track record for easing nervous stress and anxiety. The formula does this without causing drowsiness or interfering with sensory and motor functions, making it far superior to tranquilizers and other medications commonly used to treat these problems. Nutri-Calm accomplishes this by feeding the nerves and adrenal glands while balancing their function.

Nutri-Calm has been used to aid a wide variety of nerve-related disorders. It has been used to ease anxiety, chest pain due to anxiety, hyperactivity, insomnia, nervousness, restlessness, tossing and turning at night, and general feelings of stress. Nutri-Calm is particularly useful for anyone who has contraction furrows (nerve rings) in their iris.

Nutri-Calm has also been used in programs to help drug withdrawal, anorexia, alcoholism, schizophrenia, high blood pressure, and Parkinson's disease. For these purposes, it needs to be combined with other remedies and therapies, however.

Combining the benefits of the B complex vitamins and vitamin C to support the nervous system with herbs to relax and balance nerve function, Nutri-Calm is a good supplement for anyone who feels depleted by nervous stress. People usually feel calmer but have more energy when taking it. Specifically, the ingredients in Nutri-Calm are:

Wheat Germ
Wheat germ is nutrient-rich part of wheat kernel which is milled and discarded in producing white flour. It is high in the B complex vitamins.

Schizandra Berries
These small berries are considered to be an excellent tonic and restorative herb in Chinese medicine. Possessing adaptogenic properties, schizandra berries are believed to improve nervous system function, quiet restlessness and calm the heart, and balance the fluids of the body.

Bee Pollen
Bee pollen is pollen collected by bees. It contains trace amounts of every known nutrient and is considered an energy-enhancing food.

Hops
As a mild central nervous system depressant, hops are able to reduce excess activity in the nervous system. The herb has a mild sedating effect, easing tension and restlessness and promoting sleep and relaxation.

Passion Flower
A gentle sedative, passion flower is used to ease tension, anxiety, irritability and insomnia. It is helpful for insomnia and has a tranquilizing effect on many nervous conditions, including heart palpitations, panic, high blood pressure, and muscle cramps.

Valerian Root
An extensively researched herb, valerian root has been demonstrated to encourage sleep, calm mental overactivity, lower blood pressure and ease a wide variety of nervous disorders. It can be helpful for anxiety, tremors, panic, heart palpitations, and muscle tension.

Use and Dosage Information
Take 1 capsule with a meal three times a day.
